

Adobe Acrobat 4.05 Update 1

March 2000

This ReadMe document contains important information about an Update to the Acrobat 4.05 product. Please read this before installing the Update.

What is Acrobat 4.05 Update 1?

Adobe Acrobat 4.05 Update 1 contains bug fixes to several Acrobat 4.05 components.

- Update 1 may be applied to any language version of Acrobat 4.05.
- Update 1 may be applied to both Macintosh and Windows versions of Acrobat 4.05.
- There is no update required for the Unix versions of Acrobat Reader 4.05.
- Update 1 may be applied to the following Acrobat 4.05 products:
 - Acrobat 4.05a ("Full Acrobat")
 - Acrobat Business Tools
 - Acrobat Reader version 4.05.
- The Update may not be applied to Acrobat 4.0 or earlier products.
- Update 1 installs the English Web Buy plug-in and associated files into all language versions of Acrobat 4.05, Acrobat Business Tools, and Acrobat Reader. This allows everyone to acquire and open Acrobat Web Buy PDFs.
- Acrobat Reader version 4.05b in English already contains the updated components. Update 1 may be applied to Acrobat Reader version 4.05b but there will be no effect.

What is updated in Acrobat 4.05 Update 1?

The following list indicates what components are updated and what is fixed:

Windows:

Plugin Name	Problem corrected
pdf.ocx	Incomplete FDF data sent in Internet Explorer after a Post.
touchup.api	"Touching up" some PDF files created by InDesign may cause errors.
prepress.api	Acrobat/Reader may crash if new Kodak .dll files are installed.
aform32.api	Acrobat may crash on launch if Text-to-Speech function is turned on.
afill32.api	Acrobat Reader may crash on launch if Text-to-Speech function is turned on.
weblink.api	Weblink has errors with Netscape Browser in certain circumstances.
webbuy.api	Fixes errors with Administrator vs. User privileges and read-only media.
Installer change	Permissions for folder in \WinNT\Profiles\All Users changed to make accessible to All.
pdfddui.dll	Windows 2000 only: If the Compression or Font tab is touched, PDFWriter may fail and show the error message "Insufficient Memory".

Macintosh:

Plugin Name	Problem corrected
Touchup	"Touching up" some PDF files created by InDesign may cause errors.
WebBuy	Fixes errors with read-only media.

Do you need to install Update 1?

If you experience one of the problems described above, you are encouraged to download and apply the Update. If you are not experiencing problems, you may not require the Update.

How to Install Update 1

For both Macintosh and Windows users, simply launch the Update 1 application. On the Macintosh, if you have multiple instances of Acrobat 4.05 on your system, you will be asked which one you wish to apply this update to. If you would like to apply it to other instances, simply run the Update again. On Windows, the update will be applied to the currently registered Acrobat instance.

On Windows NT and Windows 2000 you must have administrator privileges to install the Update.

How will you know if you have successfully installed Update 1?

In Full Acrobat 4.05 and in Acrobat Business Tools, the Acrobat splash screen will indicate "Acrobat 4.05 Update 1" in the lower left hand corner.

For Acrobat Reader, the splash screen will not be updated. Instead, you can tell whether you have successfully installed Update 1 by examining the version of one of the updated plugins.

On Windows, locate and right click webbuy.api and choose Properties. Acrobat 4.05 included webbuy.api file version 4.05. Update 1 installs version 4.08.

On Macintosh, locate and select the WebBuy file in the Finder and choose Get Info from the File menu. . Acrobat 4.05 included webbuy.api file version 4.0.5. Update 1 installs version 4.0.8.
